

VisionR Modul

## Constructions

*This module is used to manage multiple construction sites. You can use this module either as customer or vendor. Construction sites are linked with incoming and outgoing orders and invoices. Image galleries and document attachments give a full overview of the managed sites.*

### Description

The VisionR module "Constructions" is used to manage multiple construction sites.

The managed construction sites can be located in different countries. Images and other document types (plans, scanned contracts and invoices etc.) are attached to the construction sites. There is a link to specifications and offers. Incoming and outgoing invoices are attached to investor and contractor data.

Investors and contractors have online access to their own specifications, offers and invoices.

### Functional overview

- management of multiple construction sites
- specifications and offers (bidding data)
- incoming and outgoing invoices
- management of investor and contractor data
- construction contracts
- management of images and other document types (plans, scanned contracts and invoices etc.)

### Options
