

VisionR Module  
**Vehicles**

*This module is used to manage vehicles. Manufacturers, models, years of manufacture can be used to sort vehicle data. Material and work orders can be used to provide overview of maintenance costs and to store vehicle repair history. The module can be used to manage the company's fleet on different locations or by workshops to manage vehicle repairs.*

## Description

The VisionR module "Vehicles" is used to manage parking, hiring and repairs of personal or company owned vehicles.

The module can be used by companies offering car repair services. It can also be used to manage parking places in parking lots.

Reservation and hiring of company owned vehicles can be used by employees as online service.
